What is Tizen? (Pronounced Tie Zen)

- A cross-device, open source software platform, including an operating system and user experience.
- Across multiple device segments, including smartphones, tablets, smart TVs, netbooks and in-vehicle infotainment systems.
- Tizen is a Linux Foundation project and is based on Linux and other popular upstream projects.
- We expect the first release of Tizen in 2012.

Open Source Community: What and Who

- Community includes all of the people who work on or with a project
  - **Product contributors:** kernel / distribution developers, release managers, quality assurance, localization, etc.
  - **App developers**: writing applications to run on devices
  - **Users**: people who run it on their device and provide feedback
  - **Vendors**: companies creating products based on the platform
  - **Other contributors**: promotion, moderation, documentation and more

Some people contribute as part of their employment at companies, while others contribute free time. The community includes all of the people who are doing interesting work on these projects.

Tizen.org Visitors Past 3 Months Excludes source.tizen.org

Visitors Overview

Jan 1, 2012 - Mar 31, 2012

100.00% of total visits
